THE

ELECTRICAL WORLD

AND

ENGINEER.

A WEEKLY REVIEW OF CURRENT PROGRESS IN ELECTRICITY AND ITS PRACTICAL APPLICATIONS

VOLUME XLIV.

JULY 2 TO DECEMBER 31, 1904.

NEW YORK.

ELECTRICAL WORLD AND ENGINEER

INDEX TO VOLUME XLIV.

GENERAL INDEX.

Entries from the Digest of Current Electrical Literature are indicated by D. (Digest) and D. R. (Digest Reference).

A

Aaron Electric Co. Motor, *971
Accumulators. (See Storage batteries.)
Acetylene standard of light. By Fery, (D.) 1066
Agriculture, Electricity in, (D.) 110; By Plowman, D.) 538
Air:
——Ionization of. By Schuster, (D.) 625
——Perforation distance of. By Grob, (D.) 952
——Registering atmospheric discharges. By Fenyi and Schreiber, (D.) 873
——Viscosity coefficient. By Reynolds, (D. R.) 72
Air brakes. (See Brakes.)
Air compressor valves, 832
Allgemeine Elektricitäs Gesellschaft, (D.) 1144
Allis-Chalmers Co.:
——Prizes at St. Louis, 703
——Visit of British engineers, 77.
Alloys, Magnetic. By Hadfield, (D.) 582
Alloys of bismuth and tin, Magnetic susceptibility of. By Laws, (D.) 145
Alloys of iron, Investigations of electric, and magnetic properties of. By Barrett, (D.) *221
Alternating-current curves, Plotting. By Müller, (D.) *663
Alternating-current diagrams. By Karapetoff, (D. R.) 28, 303, 661, 736, 950
Alternating-current instruments, Iron in. By Sumpner, (D.) 1144
Alternating-current rectifying effect. By Paton, 1119, 1140
Alternating-current relay for low frequencies. By Fowle, *862
Alternating currents:
——Experiments at St. Louis Exposition, *774
——High frequency currents from direct currents, (D.) *1106
——Measurements with differential telephones, 360
——Physical conception of some alternating-current phenomena. By Lyndon, *328, 359, *374, *419
——Rectification of, in gases, 242; By Nutting, (D.) 303
——Theory. By Spielmann, (D.) 430; Idanoff, (D. R.) 537
——Torque in alternating magnetic field. By Axmann, (D.) *696
——Wave form analysis. By Langsdorf, 25; Kintner, 141
Alternators:
——Armature reaction. By Henderson and Nicholson, (D. R.) 342
——Central London Ry., Data of alternator, 1050
——Commutation in, at starting. By Latour, 930
——Compounding of. By Walker, (D.) *1141
——Controlling, Winter-Eichberg-Alexander patents, *256
——Distortion of voltage curve. By Wangemann, (D.) 694; Bauch, (D.) 780
——Excitation and compounding of. By Kueppers, (D. R.) 661
——Heyland method of self-exciting and compounding. (D.) *219
——Predetermination of characteristics. By Guilbert, 925, *937
——Prime-movers for alternators operated in parallel. By Rosenberg, (D.) 180
——Regulation, Calculation of. By Canfield, 361, *369; Rushmore, 522; Karapetoff, (D. R.) 736
——Single-phase commutator motors. By Niethammer, (D.) *1103
——Testing of. By Behrend, 519
——Theory of the regulation of alternators. By Guilbert, *1047
——Theory of variation of voltage. By Torda, (D.) 342
——Turbo-dynamos. By Niethammer, *641
——Voltage drop, Determination of. By Cramp, (D. R.) 388
——Voltage regulators. By Dupuy, (D. R.) 70; Meyer, (D.) 343
Aluminum:
——American production of, 827
——Gin process of production, 66
——Production in 1903. By Struthers, (D.) 739
Aluminum alloys. By Wilson, (D.) 485
Aluminum anode films, 809; By Mott, (D.) 182, (D. R.) 537, (D.) 831
Aluminum electrical conductors, 14
"American apathy," 451
American Association for the Advancement of Science, 1120, 1134
American Electric & Controller Co. Controller, *969
American Electric Fuse Co. Lightning arrester, *440
American Institute of Electrical Engineers:
——Branch meetings and local organizations, 162
——Chicago branch, 994
——Headquarters at World's Fair, *479
——High-tension transmission meeting at Chicago, 1, 16
——June meeting, 1, 16
——Madison branch, 1005
Am. Inst. E. E.: (Continued.)
——Meeting with Institute of Electrical Engineers, 572
——November meeting, 926
——October meeting, 758
American Lava Co., 668
American Physical Society, 573, 1134
American Society of Mechanical Engineers, 776, 986
American Street Railway Association in St. Louis, 597, 600, 637, 640, 680
American Tool Works Co. Lathe, *230
Ammeter, Mercury thermal. By Carmichael, (D.) 430
Anilene, Electrolysis of acid solutions of. By Gilchrist, (D.) 783
Anodes:
——Platinum. By Tommasi, (D. R.) 697
——Pulverization of copper. By Fischer, (D.) 145
Annunciators, "Quality," *442
Arc:
——Raising the efficiency of the arc, discussed by G. N. Eastman, 719
——Singing arc. By Maisel, (D.) *694
——Temperature of the arc. By Waidner and Burgess, (D.) 829
——Tests at pressures less than one atmosphere. By Child, (D.) 388
Arc lamps:
——Baker & Wilbur flaming, 68
——Blondel patent on composite carbon lamp, 106, (D.) 736
——Candle-power, Mean spiral. By Dyck, (D.) 1141
——Carbon-feeding device. By Hatfield, (D.) *622
——Construction of. (D. R.) 581; By Zemner, (D. R.) 1064
——Discussion at International Congress, 529
——Enclosed arc in series. By Hatfield, (D.) 622; Feldmann, (D. R.) 623
——Foster lamp with hot-wire control, (D.) 661
——Impregnated carbon. By Conradty, (D.) 736
——Magazine arc lamp, (D.) 388
——Magnetite arc. By Hillman, 335
——Meridian arc lamp, (D.) 388
——Operation of enclosed, 406
——Reflector globes, *1024
——Series constant-current arc lighting. By Griffin, 337
——"Speaking arc lamp," *742
——Three-phase lamps, (D.) 1141
——(See also Lighting.)
Armature coils, Mechanical design of, 452, *461
Armatures:
——Distribution of magnetic induction in multipolar. By Thornton, (D.) 483
——Magnetic flux distribution in toothed-core. By Hele-Shaw, Hay and Powell, (D.) 1103
——Reaction of alternators. By Henderson and Nicholson, (D. R.) 342
——Winding of a direct-current generator. By Wagner, (D. R.) 143
Arrhenius, Svante, Portrait of, *413
Ascoli, Moisè, Portrait of, *413
Association of Edison Illuminating Companies, 406
Auditing for telephone companies, 689
Automobiles:
——Change speed gear. By Pfeffer, (D. R.) 389
——Experiences with charging stations, 406
——Gasoline-electric omnibus, (D.) 870
——New French machine with "arc axles," 339
——Record of electric, Providence to Boston, 31
——Telegraph car of U. S. Signal Corps, *538
——Terrace sight-seeing, *394
——Tour to St. Louis, 132
——Wireless telegraph machines, *650

B

"Back to the pine knot," 983
Bakery, Electric power in. By Heinz, *486
Balbach Smelting & Refining Co., (D.) 265
Baltimore Electric Power Co., 961
Bank, Electric savings, *437
Barnes, H. T., *416
Barretters. By Fessenden, (D.) 146; Reich, (D.) 223; Dieckmann, (D. R.) 390
Battery inventions, 66, 176, 252, 297
Bell Telephone Co.'s Pittsburg exhibit, *742
Bell telephone situation, 576
Binding post, Dry battery, *33
Bissell, F., Co., Toledo, 490
——Induction sparker, *795
Blaisdell Machinery Co. Air compressors, *795
Bleaching powder, Diaphragm process for production of. By Tarty and Guye, (D. R.) 72
Blickensderfer Mfg. Co. Electric typewriter, *114
Block signals. (See Signals.)
Blowers, Operation of, centrifugal, for cupula service. By Carrier, (D.) 108
Blue light in dentistry, 269
Bogia, Louis A. Regulating socket, *966
Boiler house economies. By Downe, (D.) 220, (D. R.) 343; Shawfield, (D.) 829; Kershaw, (D. R.) 907
Boilers:
——Corrosion in. By Standage, (D. R.) 343
——Forcing capacity of fire-tube. By Dean, (D.) 1105
——Induced draft plant, (D. R.) 1065
——Interborough Rapid Transit Co., 605
——Rust water-tube, *441
——Softening feed water. By Wiesler, (D.) 144
Book reviews:
——Application of Electric Motors to Machine Driving. By Andrew Stewart, 147
——Care and Handling of Electric Plants. By N. H. Schneider, (D.) 183
——Compendium of Drawing, 112
——Die Metalle. By Bernhard Neumann, 30
——Dynamo, The. By C. C. Hawkins and F. Wallis, 147
——Dynamomaschinen für Gleich und Wechselstrom. By Gisbert Kapp, 111
——Essais Industries des Machines Electriques et des Groupes Electrogènes. By F. Loppé, 148, 223
——Fowler's Mechanical Engineer's Pocket Book, 431
——Mechanical and Electrical Inventions. By E. K. Adams, 584
——Metric Fallacy. By F. A. Halsey and S. S. Dale, 757, 784, 1011
——Modern Electricity. By James Henry and K. J. Hora, 147
——Modern Wiring Diagrams and Descriptions for Electrical Workers. By H. C. Horstmann and V. H. Tousley, 183
——Moody's Manual of Corporation Securities, 431
——Practical Testing of Dynamos and Motors. By C. F. Smith, 266
——Static Electricity. By Hobart Mason, 147
——Traité Elementaire des Enroulements des Dynamos a Courant Continue. By F. Loppé, 183
——Transactions of the National Electric Light Association, 1018
——Twentieth Century. Hand Book for Steam Engineers and Electricians. By C. F. Swingle, 31
——Uses of Electricity on Shipboard. By J. W. Kellogg, 266
——Wechselstromtechnik. By M. T. Zsakula, 111
Boosters:
——Dock yard of Midland Ry. Co., (D.) 108
——Use of. By Ittersum, (D.) 782
——Use of, during discharge of battery. By Doblet, (D.) 145
Boring and drilling machine, Bement-Niles motor-driven, *185
Boring machine, Electric, *818
Boston, Use of electrical current in, 52
Boston Rapid Transit Commission, Report, 890
Brackets, Pothead, for telephone cables, *490
Brakes, Railway:
——Air brake valve on car truck in New York subway, *761
——Air brakes in city service. By Boynton, (D. R.) 582
——Automatic air brakes. By Fuller, (D.) 908
——Electric railway, Tests of. By Kramer, (D.) 71, 870
——Energy required when braking with air. By Rae, (D. R.) 908
——Street railway. By Scholtes, (D.) 484; Denson, (D.) 695
Breakdown of electrical machinery, (D.) 428
Bremer lamp, *421
Brewery electric installation near Vienna, (D.) 70
Bridge, Williamsburg, Illumination of, *1083
British Association for Advancement of Science, (D.) 431
Bromides of alkalies, Electrolysis of. By Kretzschmar, (D.) 738
Bromoform, Electrolytic production of. By Müller and Loebe, (D.) 72
Brooklyn Polytechnic Institute, 1137, 1098
Brushes, Carbon. By Knowlton, 518; Ornstein, (D.) 1064
Bucket, Coal grab, *187
Buffalo, Niagara power in, 933, *987
Bullock Mfg. Co.'s St. Louis exhibit, *836
Bunsen Society. By Danneel, (D. R.) 182, 537
Bureau of Standards, Organization and work of, 87
Burke Electric Co., 200
Bus-bars. Dimensions of. By Feimark, 906; Meurer, 1140

C

Cable railway, Incline, *554
Cables:
——Calculation and determination of single-phase and polyphase cables. By Lichtenstein, (D. R.) 303
——Duplex balancing of telegraph cables. By Gaye, (D.) *664, 832
——Eddy current losses. By Field, (D.) 485
——Heating of. By Teichmüller, (D.) 1016
——Heating of underground three-phase cables. By Apt and Mauritius, (D.) 1105
——Insulation of. By Schmidt, (D.) *909

*Indicates illustrated articles.

133943

Cables: (Continued.)
——Laying cables. By Andrews, (D.) 1016
——Lead-covered telephone cables damaged by insects, *95
——Location of faults in cables and use of Murray & Varley loop tests. By Fisher, 1038, *1045, 1098
——Maximum currents permissible in direct-current cables. By Krath, (D.) 1016
——Paper and rubber insulated cables for high-tension work, Comparative merits, 19
——Perforation voltage of. By Kath, (D.) 181
——Protection from arcs due to failure of adjacent cables. By Carlton, 16
——Resonance in three-phase. By Humann, (D.) *782
——Sheath losses of three-core cables. By Morris, (D.) 624
——Standards of British Committee, (D.) 484
——Tests of three-core cables, (D.) 782
Cables, Submarine:
——Construction of. By Medina, (D. R.) 871
——Construction of telephone. By Breisig, (D.) *625, 663
——Testing, by Röntgen rays. By Otto, (D. R.) 697
Cables, Telephone:
——Austin, Minn., Cable and pole line, 281, *293
——Cost of lines. By Dommerque, (D.) 390
——Locating faults in telephone cables. By Stabler, *326, 360
——Propagation of an alternating current along a telephone cable. By Fleming, (D.) 146
Schleifenbaum and Schürer, *866
Cadmium amalgam lamp. By Lummer and Gehrcke, (D.) *1104
Calcium, Electrolytic production of. By Rathenau, (D.) 182; 252
Calculation of traction networks. By Kerbaker, (D.) *1016
Calibrating integrating meters, Simple method for. By Morrison, 137
Calibrating resistance boxes. Direct treating apparatus for. By Wolff, (D.) 110
Canada, Electrical progress in. By Johnson, (D.) 830
Canadian Electrical Association, 15
Canal traction:
——Electric towing on Teltow canal, (D.) 144
——Mechanical systems of. By Davies, (D.) *535
Capacity:
——Measuring. By Rosa and Grover, (D.) 222
——Rigidance, a new name for the reciprocal of capacity. By Ives, 241, *248
Car lighting, Emergency system of, (D. R.) 70
Car wheels, Cost and maintenance. By Banister, (D.) 951
Car wiring, 125, 141
Carbon, Manufacture of artificial. By Zellner, (D. R.) 739
Carbon brushes. By Knowlton, 518; Ornstein, (D.) 1064
Carbon cell of Reid, (D. R.) 1065
Carbons, Flame arc. By Ornstein, (D. R.) 1064
Carhart, H. S., *414
Carlisle & Finch Co., *965
Carnegie and the Franklin Fund, 1138
Cars:
——Alternating-current motor car, *331
——Autographic test car. By Herrick, (D. R.) 1016
——Design of interurban. By Boynton, (D.) 695
——Equipment and maintenance of trolley. By Aldworth, (D.) 830
——Fire cars on Chicago elevated, 1009
——High-speed cars on Zossen line. By Buhle and Pfitzner, (D. R.) 343
——Independent motor cars on railways. By Dawson, (D.) 908
——Motor cars on European railways, (D. R.) 264
——Steel, N. Y. rapid transit, *761
——Worm reduction gear on trolley cars. By Domon, (D.) 830
Catalysis and electrolysis. By Thatcher, (D.) 831
Central station meter department. By Cridge, (D.) 223
Central stations:
——American and British practice in electricity supply. By Taite, (D.) 1143
——Cape Town, Africa, (D. R.) 28
——Carville, Eng., (D.) 143, 220, 302, 389
——Columbus, Ohio, Public Service Co., Lighting and heating, *927
——Cost of power for traction, Boston Ry. Co., (D.) 581
——Cost of power in ore-reduction works. By Simpson, (D. R.) 695
——Cost of power in a railway plant. By Knowlton, 900
——Costs of electric supply. By Turner, 337
——Derby, England, (D.) 389
——Eastern Railroad of France. By Pataud, (D.) 624
——English municipal plants, T. P. Wilmshurst on, 09
——Exeter, England, *210
——Faversham, Eng., (D.) 71
——France:
Jonage Canal, in Cusset. By Herzog, (D.) 144
St. Etienne, Development at, 105
Statistics. By Toulier, (D.) 624
——Frome, Eng., lighting station, (D. R.) 264
——Gas engines, Leek, England, (D. R.) 389
——Generation and transmission of electrical power discussed by L. B. Stillwell, 678, 690
——Increasing central station loads, 688
——Interborough Rapid Transit Co., N. Y. City, 61, *601; (D. R.) 695; 773
——Ipswich, Eng., (D.) 343
——Jacksonville, Fla., municipal lighting plant, *138
——Japanese:
Curves showing total capacity, 1006
Hydro-electric plant in Iyo, *53
Central stations: (Continued.)
——Kansas City. Missouri River Power Station, *741
——Kettering, Eng. Refuse destructor, (D. R.) 28
——Ladysmith, Natal, (D. R.) 221
——Lima Electric Ry. & Light Co. By Rae, (D.) 1065
——Location of electric stations. By Adams, 372
——London:
Brimsdown station, (D. R.) 389, (D.) 429, 536, 623
Lot's Road station, (D.) 870
Poplar station, (D.) 145
Twickenham and Teddington High-tension, direct-current system at. By Tilney, (D.) 661
Willesden power house, (D.) 695; *813
——Lyons, France, municipal plant, *681
——Midland Ry. Co.'s harbor plant, *608
——Municipal lighting plant failures, 1134
——New Orleans, (D. R.) 301
——New Orleans Railways Co., (D.) 71
——New Zealand, Combined electric plant and refuse destructor, (D.) 907
——Niagara Falls plants, *891, 933, *987, *1041
——North Eastern Ry. and upon Tyneside (England), (D.) 483
——Paris:
Future business, (D.) 1143
Issy station extension, 31
——Problem of distribution as discussed I. E. Congress, 470, 639
——Puget Sound Power Co., *553, *612
——Radcliffe works, England, (D.) 1064
——St. Louis Exposition plant, *574
——Sheffield, Eng., Two-phase turbo-generator station, 162, *165
——Single-phase vs. polyphase motors for power distribution. By Hoit, 334
——South African industries, (D.) 695
——Steam turbines:
Baltimore, 1069
Dubuque, Iowa, (D. R.) 264
Johnstown, Pa., *376
Neufchatel, Switzerland, (D.) 737
——Stoke-upon-Trent, Combined lighting and refuse plant, (D.) 952
——Supply houses and central stations, 334
——Switzerland, in Valais County. By Bignami, (D.) 830
——Twin City power plant. By Knowlton, (D.) 1104
——Worcester Electric Light Co., 1050
——World's Fair at St. Louis, *257
——(See also Isolated plants; Sub-stations; Transmission plants.)
Century Electric Co. Alternating-current motor, *839
Chain, Silent, for driving machinery, *964
Chain drive, High speed, in motor plants. By Hill, 873
Charging for electric current:
——Baumann multiple tariff meter, (D.) 265
——Determination of meter rates discussed by A. M. Hunt, 86, 102
——Discussion. By Hoppe, (D. R.) 582
——Low prices for large quantities. By Walsh, (D.) 623
——Multiple tariff meter. By Rasch, (D. R.) 223
——Proposed method. By Hunt, (D.) 662
Chemical dissociation and electrical conductivity. By Garrett and Willows, (D.) 738
Chemical engineer. By Sanders, (D.) 182
Chemical industries in the U. S. By Schweitzer, (D.) 831
Chemists, Training of. By Ramsay, (D. R.) 697
Chicago Fuse-Wire & Mfg. Co.'s exhibit, *539
Chicago Pneumatic Tool Co. Drill, *874
Chicago Storage Battery Co. Washable cell, *114
Chicago Telephone Co.'s "juice wagon," *1000
Chlorine, Electrolytic, Use of. By Winteler, (D.) 430; 828
Chloroform, Electrolytic preparation of. By Teeple, (D.) 72
Cigar lighter, Electric, 912
Cincinnati A. I. E. E. local meeting, 88
Circuit breakers:
——Construction and use of "reverse-current." By Scott, (D.) 536
——Westinghouse oil, *1068
Citizen Telephone Co., Columbus, Ohio, 346
Clark cell as a legal standard of e. m. f., 320, 524
Clock, Electric, (D.) 832
Coal, coke and gas production figures, 1008
Coal conveyors, Motor-driven, *379
Coal handling plant at power station of Interborough Rapid Transit Co., 604
Coherence and recoherence. By Shaw and Garrett, (D.) 72; (D. R.) 344
Coherers:
——New design. By Hornemann, (D.) 30
——Theory of. By Harden, (D.) *871
——Tissot, *99
Coils, Magnetic reluctance of air cores in. By Thornton, (D.) 663
Colorado Electric Light Power and Railway Association, 552
Colorado lighting convention, 1060
Columbia University, Electrical anniversity at, 776
Commercial Cable Co., 970
Commercial Traveler's Exposition in Boston, 707
Commutation:
——Commutation and stray field in direct-current machines. By Niethammer, (D.) 1015
——Commutation in alternating-current motors at starting. By Latour, 930
——General principles of. By Neild and Banting. (D. R.) 661
——Tests. By Keller, 282, *289
Commutators:
——Automatic. By Gray, (D.) 832
——Construction of. (D.) *107
Compass devised by Heit, (D.) 1066
Condensation nuclei, 599
Condensers:
——Absorption of energy in, 163
——Construction of commercial electric. By Montpellier, (D. R.) 430; Lombardi, (D.) 697
——Experimental investigation. By Earhart, (D.) 265
——Mica condensers, Capacity of, 198
——Rigidance, a new name for the reciprocal of capacity. By Ives, 241, *248
——St. Louis Fair plant, *440
——Tests with high-tension condensers. By Moscicki, (D.) 221
Conduction of electricity through high vacua. By Strutt, (D.) 344
Conductivity:
——Electric, of flames. By Wilson, (D.) 582
——Electrical, and chemical dissociation. By Garrett and Willows, (D.) 738
——Measuring conductivity of electrolytes. By Addicks, (D.) 344
Conductometer. By Appleyard, (D. R.) 30
Conduit work, Hints on. By McMackin, (D. R.) 871
Conduits, Condensation and (D.) 28
Congress of Arts and Sciences at the St. Louis Exposition, 86, 549
Contact maker, Magnetic. By Shedd, (D.) *390
Contractor, Status of the electric. By Scott, 423
Controller Company's telephone exhibit at St. Louis, *1023
Controllers:
——American motor speed, *969
——Automatic, for electric circuits, Zweigoergk patent, (D.) 71
——Design of, for heavy hoisting machines. By Edler, (D.) 429
——Machine tool controllers, *228, *306
——Multiple control of press motors. By Allen, *323
——Printing press controller, *347
——Tests of Allen-Bradley, 971
——Two-motor, Use of, with four-motor equipment. By Taylor, (D.) 908
Converters:
——Churcher electrolytic, 299
——Cooper Hewitt, *1058
——Dust guards for rotary, 261
——Novel synchronous, 778
——Voltage ratios in synchronous, Graphical method of representing. By Ferguson, 733
Copper anodes, Pulverization of. By Fischer (D.) 145
Copper mines of Lake Superior region. By Richard, (D. R.) 697
Copper plating. By Maximowitsch, (D.) 1017
Copper refinery, (D.) 265
Copper sulphate, Electrolysis of. By Foerster and Coffetti, (D.) 738
Corporations, Federal franchise control of, 1137
Corrosion, Electrolytic. By Mansfield, 622; Hyde, 661
Cost of manufacture, Formulas for calculating, (D. R.) 111
Coupling, Flexible, for armored conduits, *587
Crane controllers, 217, 587
Cranes, Electric:
——Admiralty Pier at Dover. By Guarini, (D. R.) 535
——Half-portal crane, *611
——Missouri River Power Station, Kansas City, *741
——Separate motors for each motion. By Warr, (D. R.) 220
——Shipyard crane, *259
——Southampton graving dock, (D.) 389
——Tests of electric and hydraulic, at Middlesbrough Dock, (D.) 108
——Vs. hydraulic, for riveter towers. By Kleinhaus, 11
Crescent Co. Line switch, *308
Crocker-Wheeler Company to give expert advice, 31
Crompton, R. E. B., *416
Cupola fan practice. By Carrier, (D.) 108
Current-bearing matter, Properties of. By Heyl, (D.) 830
Current collectors on electric cars. By Reichel, (D.) *27
Cutler-Hammer Mfg. Co:
——Controllers, *228
——Motor-starter, *77
——Train control system, *1099

D

Dayton Mfg. Co. Silvey storage battery, *701
Deane Steam Pump Co. Tar pump, *968
Deflections, Reading. By Chabot, (D.) *182
De Forest, Dr. Lee,—Wireless dinner in London, 812
De Forest Company at World's Fair, *392
Diagrams of alternating-current phenomena. By Neithammer, (D. R.) 107
Diaphragm, Porous, for electrolytic cells. By Perkin, (D.) 389
Dimensions of physical quantities. By Johnson, (D.) 871
Dimmer for theatre lighting, (D.) 951
